

Original
New Product Introduction
Process Flow
(Before Optimization)

Process Flow Chart Characteristics:

- The Process Flow Chart Is A High Level Document That Shows The Various Steps And Organizations/Functions That A Process Follows.
- The Intent Of This Chart Is To Show The Process As It Is. By Doing So, It Will Show Redundancies And Unnecessary Steps. It Will Show Where The Various Functions Should Be Eliminated, Combined, Or Modified.
- This Chart Provides The Foundation For Process Flow Challenges So The Optimized Process Flow Can Be Developed.
- This Chart Is One Of The Tools Used To Identify Potential Stakeholders.
